

R programming language for data analysis

Dear UNAM academics, researchers and Postgraduate students

The library in collaboration with the Centre for Research Services would like to invite academics and postgraduate students interested in using the R program for research data handling and analysis to the workshop offered through the Regional Universities Forum for Capacity Building in Agriculture (RUFORUM).

R is an open-source software that provides a wide variety of statistical (linear and nonlinear modelling, classical statistical tests, time-series analysis, classification, clustering,) and graphical techniques, and is highly extensible.

Facilitator: Prof. Adipala Ekwamu

When: 07 - 11 February 2022 and from 14 - 18 February 2022

Time: 10:00AM EAT
