

Continuous Professional Development: Tuberculosis Update

COVID -19 has dramatically reduced TB notification rates worldwide, including Namibia and for the first time in over a decade, there is an increase in TB related mortality.

Join us as we unpack these statistics, and update you about current developments in epidemiology, diagnostics and treatment of TB.

Event details:

Date: Tuesday, 15 March 2022

Time: 18:00 – 20:00 pm
