TARGET AUDIENCE

Academics, Instructors, Senior Education Officers, Tvet Trainers, Learning and Development Managers, and Training Officers.

The Centre for Innovation Learning and Teaching Enhancement (CILT) is offering an Online Pedagogies short course to support educators as part of the continuing professional development requirements.

CRITERIA FOR ADMISSION

A minimum of NQF Level 5 Teaching/Training qualification from a recognised institution.

PURPOSE

This Professional Development Course is developed to support educators and trainers to acquire knowledge and skills to utilise online tools and use of learning management systems.

EXIT LEARNING OUTCOMES

Upon completion of this short course, participants should be able to:

- Identify and analyse the philosophical underpinning of learning and teaching in Higher Education and Training.
- Compare and contrast between teaching in the face-to-face classroom and teaching online.
- Distinguish instructional design approaches for online courses and how instructional designers and subject matter experts collaborate in the design and development of online courses.
- Apply the principles of constructive alignment to the planning and design of an online course.
- Demonstrate best practices for developing and presenting learning content in online courses.
- Apply strategies and best practices for facilitating online courses and managing time for regular learning tasks.
- Develop an assessment strategy for an online course.
- Apply various types of assessment methods suited for the online environment.
- Use a variety of Learning Management Systems (LMS) such as Moodle and tools for developing learning content and assessment activities.
